# Advances in Stroke Recovery

## 2023

**January 23-25, 2023 | Digital Conference**

Providing frontline clinicians and researchers around the globe with the latest approaches to optimize stroke outcomes from rehabilitation

**This three-day accredited virtual meeting brings together more than 55 speakers from every continent.**

- Hear from the leaders in the field about the Next Big Thing in stroke recovery and rehabilitation
- Learn about advances in medication and rehabilitation
- Understand global challenges in delivering stroke care
- Discover innovative personalized approaches to treating patients
- See new and cost-effective models for delivering rehabilitation
- Join the global community to tackle one of the world's biggest health challenges.

### **Who should attend?**

Everyone who works on the frontlines of stroke rehabilitation care and research:

- Allied health in stroke  
(Physiotherapists, occupational therapists, speech-language pathologists and therapists, recreation/ leisure, psychologists)
- Basic and clinical university and hospital-based researchers in stroke
- Stroke nurses
- Geriatricians and psychiatrists
- Rehabilitation medicine physicians
- Neurologists
- Engineers, technicians and technologists
- Family doctors
- Policymakers and thought-leaders
- Stroke survivors and advocates

For the first time, global leaders in stroke recovery are coming together to share the latest Advances in Stroke Recovery. The content-filled [PROGRAM](#) features the top experts in the field.

The Advances in Stroke Recovery conference includes some unique features:

- An interactive poster floor. Top-ranked abstracts will have the opportunity to do oral presentations;
- Abstracts published in the journal *Neurorehabilitation & Neural Repair*;
- A Brag-and-Steal session featuring innovators from around the globe. In rapid fire, presenters brag about their successes and urge others to steal the ideas;
- The ability to access recorded sessions after the conference; and,
- Accreditation.

Among featured speakers:

Discussing the latest advances in precision neurorehabilitation:

- Steve Cramer, USA
- Arne Lindgren, Sweden
- Sook-Lei Liew, USA

Sharing advances in the use of adjuvant therapies to help stroke rehab:

- Robert Teasell, Canada
- Christian Grefkes, Germany
- Teresa Kimberly, USA

Probing the global challenges of delivering stroke rehab care:

- Pam Duncan, USA
- John Solomon, India
- Julie Bernhardt, Australia

## This is the go-to meeting of the year, but don't just take our word for it.

“By sharing cutting-edge research across the translational pipeline and best practices, Advances in Stroke Recovery will improve the delivery of stroke rehabilitation, reduce disability, and restore lives.”

— **Sean Dukelow MD PhD FRCPC**  
Co-Scientific Director, HSF Canadian Partnership for Stroke Recovery  
Co-Chair, Advances in Stroke Recovery

“As a front-line clinician, this conference will not only enable me to learn about current treatments being provided around the world, but will also inform me about new research. This will help me to stay up-to-date in my care.”

— **Debbie Timpson MD FRCPC**  
Physiatrist, Pembroke Regional Hospital, Canada

“Looking for up-to-date knowledge, creative innovations and good-practice integration? The Advances in Stroke Recovery Conference 2023 has it all!”

— **Geert Verheyden PhD FESO**  
Professor, KU Leuven, Belgium

“This is a conference that brings topics of interest to all scientists in stroke: innovations in clinical research, new directions in basic science, and discussions in aligning these two toward the discovery of new therapies in stroke recovery.”

— **S. Thomas Carmichael MD PhD**  
Chair, Dept of Neurology, UCLA  
President, American Society of Neurorehabilitation

“Advances in Stroke Recovery is a go-to meeting that brings together preclinical and clinical researchers, clinicians, and people with lived experience of stroke.”

— **Kate Hayward PhD PT**  
Senior Research Fellow, University of Melbourne, Australia  
Co-Chair, Advances in Stroke Recovery

“Every clinician working in stroke care around the world should attend Advances in Stroke Recovery.”

— **Andrew Demchuk MD FRCPC**  
Chair, Canadian Stroke Consortium  
Co-Scientific Director, HSF Canadian Partnership for Stroke Recovery
